Глава 6 — Нейробиология зависимости: дофамин и GABA против вечности

Из дневника — Наблюдения нейрохирурга Виктора Ли-28 Медицина

Когда человек, который, казалось бы, имеет абсолютно всё, начинает медленно умирать внутри. Наблюдение за этим процессом — самое трудное, что я делал в своей жизни.

Ключевые понятия этой главы

Понятие	Простое объяснение	Зачем нужно пациенту
Награда, мотивация / Дофамин	Нейромедиатор — химический посредник между нейронами. Отвечает за предвкушение, мотивацию, обучение. Вещества, вызывающие зависимость, вызывают его выброс, или имитируют его действие.	Чтобы понять, почему «хочу» и «люблю» — не одно и то же.
Подкрепление, усиление / Усиление	Нейронная реакция + память. Мозг запоминает, что привело к награде, и повторяет это.	Я goal должен быть достижимым и измеримым. Цель — «больше не пить» — плохая цель. Цель — «сегодня не пить» — хорошая.
Синдром отмены / Ломка	Неприятные ощущения при прекращении приема. Они разные: физические, психологические. Ломка — самая известная.	Чтобы знать, что ожидать, и не паниковать. Ломка — временно. Тяга — может длиться годами.

Глава 6 — Нейробиология зависимости: дофамин и GABA против вечности

Из дневника — Наблюдения нейрохирурга Виктора Ли-28 Медицина

Самый страшный враг, который когда-либо встречался мне на операционном столе, был невидим. Он не имел формы, не оставлял шрамов на коже. Он жил в самых глубоких структурах мозга и медленно, терпеливо разрушал человеческую личность.
